

ADDENDUM TO OWNER'S MANUAL FOR ALL MENDOTA ZC FIREPLACES

Date: January 3, 2005

Subject: Selkirk Direct-Temp Venting Components Approval

Direct Vent Pipes and Components manufactured by Selkirk Metalbestos and branded as Selkirk Direct-Temp have been approved for use with all Mendota Zero Clearance Fireplace Models (DXV35, DXV42, DXV45 and DXV60). Selkirk Direct-Temp pipes and components may be used to create a vent system for all Mendota Zero Clearance Fireplace Models.

The clearances to combustibles for Selkirk Direct-Temp vent pipes and components are as follows: one (1) inches from the sides of the pipe or vent component in a vertical section, one (1) inches below any pipe or venting component in a horizontal section, two (2) inches above any pipe or venting component in a horizontal section.

Attached to this Addendum is a PDF file containing a cross-reference chart that provides a direct reference between Selkirk Direct-Temp components and Simpson Dura-Vent Direct Vent GS components.

Sincerely,

Raj Thapa
